Designated Walking and Biking Routes

Cleveland Safe Routes to School

Parents should walk with their children to assess their safety skills before deciding if they’re ready to walk with a few friends. Generally, children under 10 years old are not ready to judge safe times to cross a street.

This map is a guide to choose a safe route to walk or bike to school. Keep in mind, it is very likely not the same way you would travel in a car.

SRRTS encourages parents to walk or bike with students to and from school. This map is a guide. Parents are responsible for choosing the most appropriate way to travel based on their knowledge of conditions along the route, and the experience level of their child.
